Windorah QLD

Restrooms & Caravan Waste Dump Point with CWT

One of two sites for Barcoo Shire Council, this project required toilet facilities for trucks and grey nomads as well as a caravan-toilet-waste dumping point. The sites were midway between Windorah and Birdsville (approx. 200km from the nearest town).

Barcoo Shire Council had excavated and prepared the site for the CWT collection well. The crew camped on site for 2 nights and installed a Pureblue Countrystyle CS2 building. The Pureblue Pre-fab style of construction kept onsite work to a minimum - essential for a job like this. You can't dash into town to get some spare parts or tools!
